

simplifying **RECYCLING**  
**SORT 10**  
MULTI-STREAM  
RECYCLING SYSTEM

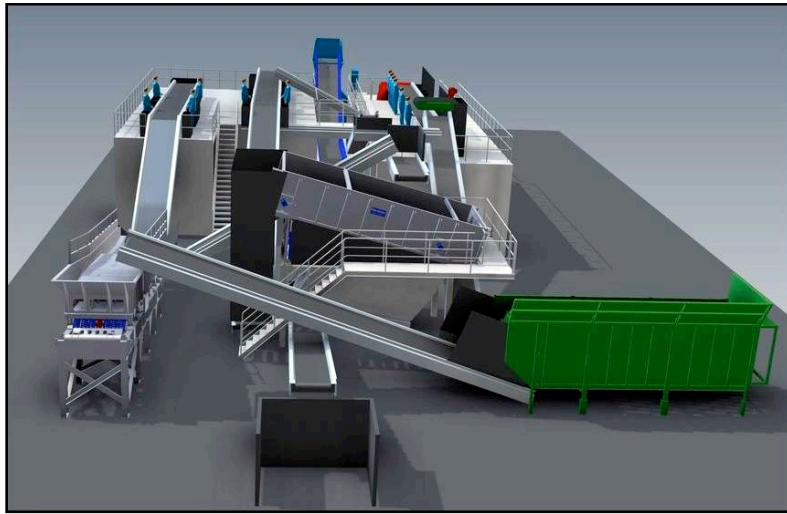

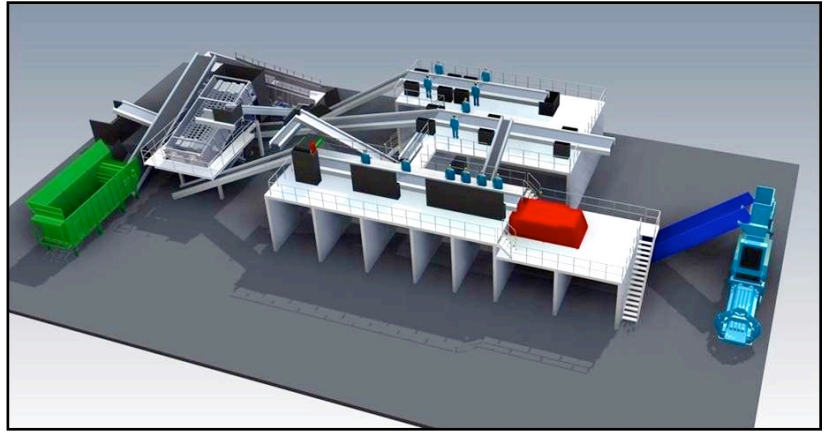

Featuring:

Vibratory Screening  
Ballistic Separation

## FEATURES:

- Average 10 - 12 Tons Per Hour Throughput
- 7,000 - 8,000 sq. ft. Equipment Footprint
- Low Height Requirement
- Low Operational and Maintenance Cost
- General Kinematics Vibratory Screening
- Hartner Ballistic Separation

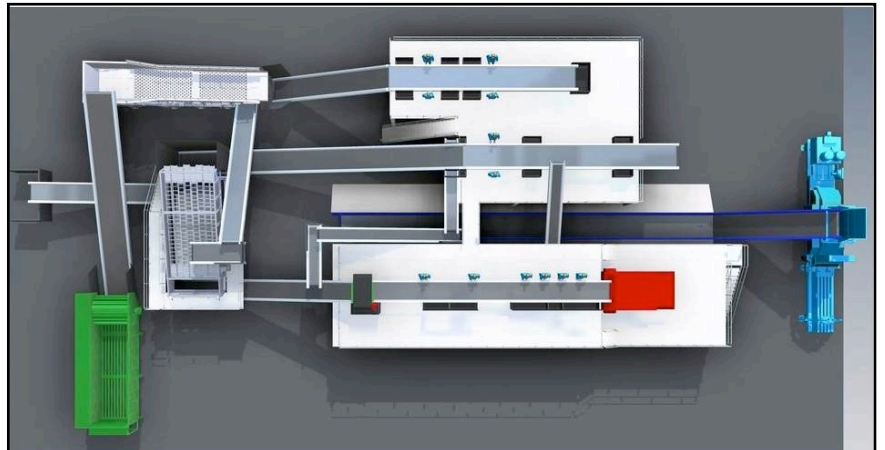

## FEATURES:

- Ability to process household, commercial, industrial and office waste
- Capability of processing high glass content waste streams
- Lower Capital Cost
- Minimal Equipment Footprint
- Modular Construction
- Efficiency Improvement Options

## EFFICIENCY IMPROVEMENT OPTIONS:

- Automatic Bag Opening System
- Storage and Metering System
- Optical Sorting for containers
- General Kinematics De-Stoner for Glass Clean-up

Sorting Solutions for the Future...
